## **PROFESSIONAL EXPERIENCE**

### **TUCOWS INC, Toronto ON, 2015-2024**

#### **Director of Engineering, Platform Architecture**

- Responsible for strategic planning of Wavelo platform Architecture.
- Led a team of 34 engineers, managers and product managers.
- Designed and implement implemented Wavelo's event driven microservice architecture. [Openstack, Terraform, Kafka, Nomad]
- Partnered with engineering teams to provide technical guidance on system architecture trade-offs, balancing performance, reliability, and maintainability.
- Ensured fault tolerant high availability for 8 million BOOST subscribers. [Openstack, Terraform, Grafana]
- Collaborated with other department leads to deliver on strategic initiatives.
- Led an observability transition from Datadog to Grafana saving +\$10M in operating costs.
- Delivered self-service platform tools allowing internal engineering teams to opt-in to platform services while they focus on their business initiatives.
- Secured \$2M with Scientific Research and Experimental Development (SR&ED) Tax Credit.
- Designed and engineered Wavelo event gateway to manage ingress of millions of daily customer requests. [Typescript, Redis, Kafka]

#### **Engineering Manager, Tucows Domains (2017-2021)**

- Responsible for both the OpenSRS UI Hover engineering teams [Rails, React].
- Managed cross-functional collaboration and project delivery.
- Took a hands-on approach coding & leading teams of 4-6 people.
- Led technical discussions and design reviews, guiding engineers through complex trade-offs in distributed system design.
- Provided Kafka event driven reference architecture and migration plan to modernize OpenSRS. [Python, Perl, Kafka]
- Manged Hover beyond the 2 million domains under management milestone.
- Rejuvenated Hover background processing with Sidekick.
- Modernized CICD pipelines from Jenkins to github actions
- Delivered modern domain admin tooling with Vuejs.

#### **Senior Software Engineer, Tucows Domains (2015-2017)**

- Delivered key frontend components for GDPR readiness [Perl, Vuejs, React].
- Provided timely improvements to aging SOLR implementation.
- Contributed to the OpenSRS Domain Platform migration, enabling Tucows to integrate millions of domains from acquisitions like MelbourneIT and ENOM [Python, Perl].
- Worked with the Automattic team on the PHP OpenSRS toolkit leading Tucows to acquire Millions of

WordPress.com domain registrations from GoDaddy.

- Led engineering efforts for ongoing improvements and modernization of the OpenSRS platform.

## **FIRE ENGINE RED, Philadelphia PA, 2012-2015**

### **Senior Software Developer, Student Search**

- Focused on developing solutions to help America's colleges and universities connect with prospective students.
- Played a key role in delivering a CRM-based admission and alumni search solution. [PHP, Symfony, Laravel]
- Leveraged Apache Solr to provide real-time, multi-user search capabilities and decision-making.
- Provided guidance and leadership on testing & refactoring of legacy codebase.

## **MEDICAL PHARMACIES GROUP INC, Pickering ON, 2003-2012**

### **Senior Software Developer, Pharmacy Engineering**

- Led a small, focused team of 3 engineers dedicated to improving patient outcomes.
- Relied on automation to maintain efficiency and maximize impact with limited resources.
- First to market on innovative mobile pharmacy interaction tools. [PHP, Javascript]
- Delivered a patient aware drug inventory system servicing thousands of beds that drastically reduced medication errors and pharmacy waste. [C++, GTK]
- Implemented a highly available data warehouse solution across 30+ retail locations, providing the organization with much needed business and patient care insights. [VMware]
- Maintained operational redundancies with hardware and software. [Perl, VMware]

## **FORMAL EDUCATION**
